OBJECTIVE

I seek challenging opportunities where I can fully use my skills for the success of the organization.

EXPERIENCE

OM Industries	1/5/2020
Quality Assurance and Quality Control Engineer	-
Work as Quality Assurance and Quality Control Engineer and deal with inspection of machined jobs.	30/11/2020
Ashokarao Mane Polytechnic, Vathar tarf Vadgaon	13/2/2023
Lecturer	-
Work as lecturer in Department of Mechanical/ Automobile Engineering.	

EDUCATION

Annasaheb Dange College of Engineering and Technology, Ashta.	
B.Tech (Mechanical Engineering)	2022
6.19	
Sonai Junior College, Talasande	2017
HSC	
68	
Balawantraw Yadav Highschool, Peth Vadgaon	2015
SSC	
88	

PROJECTS

Development of Recycled Waste Sorting Robot Using Machine Learning Algorithm

We develop a robotic arm that uses machine learning algorithm and open cv for run the object and recognition of various recycling waste materials. Using these we segregate the waste materials according to their properties into different categories. This arm helps to reduce errors and achive better quality of separated waste materials in recycling plants.

Comparative Analysis of Discharge Coefficient bye using V-notch

We use different sensor and aurdino to automise the V-notch experiment in fluid mechanics laboratory. Using this set-up we calculate final discharge value of water. This set-up is give accurate value in less time.

Design a clone of YouTube using html CSS and JavaScript

Using programming languages like HTML, CSS and JavaScript created a clone of YouTube on a webpage.
